

K-LOVE radio is heard on 90.7 FM in Minneapolis. As a resident of Minneapolis it is important to me and my family to have access to a radio station that offers a positive message. To have this positive music and message removed from our market would have a negative impact on my community. I believe that K-LOVE provides a positive and needed service to the people of Minneapolis, and is a great alternative to what is found at other stations on the radio dial. I urge you to withdraw any proposal that would give LPFM stations priority over FM translators. Thank you. Paul Frost.
